WordsEye should focus its resources as an education tool, offering a tiered cost structure

What market should WordsEye target?

Education Industry

How should WordsEye position itself?

Gamified Education Platform Provider

WordsEye must focus on the blue oceans in Ed-tech and appeal to educational providers

CONTEXT

The Metaverse is still in the development stage
- Predicted $5 Trillion market in 2030
- Expected maturity in 2030

Technical revolution
- Interactions are shifting to digital

COMPETITORS

Gaming
- Roblox, Epic Games
- Manticore Games – Core
- Riot Games

Ed-Tech
- **Meta**
- Duolingo
- LinkedIn Learning
- Coursera

CUSTOMERS

Purchaser – Provider
- Education administrator
- Parents

End Users – Receiver
- English language learners
- K-8 education
- ESL

Software intrigued
- Tech-savvy lacking artistic ability
- Technophile

COLLABORATORS

- Content providers
- Venture capital

COMPANY

- Web-based text-to-model software
- Encourages creativity and spontaneity

wordseye™

To emerge as the leader, they need to focus on the market opportunities

Strengths

- Low barrier to use
- Adaptability
- Easy accessibility
- Animated education

Opportunities

- **Online education market** is booming
  - 75% of schools planning to operate online in 2021
  - E-learning a $315B industry now with 20% CAGR through 2028
- **Metaverse** in the **development stage**
  - Expected to grow from $47B now to $678B by 2030

Weaknesses

- Outdated animation software
- Jargon-heavy website
- **Weak brand presence** on social media - Instagram and YouTube pages have less than 100 followers/subscribers

Threats

- Adobe patented generating 3D content from NLP in 2020
- Meta invested $150M in Immersive Learning
- Existing open-source metaverses

WordsEye should target institutional education-provider and school students

Potential Industries

- Education
- Gaming
- Fashion
- Online shopping
- Interior designing

✓ Rapid growth in online education
✓ Technical feasibility for WordsEye

Education Customer Segments

Education-provider (Potential customers)

- Individual edu-provider
- Institutional edu-provider*

Education-receiver (End-users)

- Single-student
- School students

- Sufficient budget
- Online education trend

- School students are the end-user of educational tools

*Note: Institutional education-provider includes teachers in schools, educational institutions, etc

WordsEye should position itself as a highly customizable platform, focusing on education industry

Competitive Landscape Assessment of Educational Value and Gamification

WordsEye positioning

- Interactive, gamified online education provider
- Highly designable, creator-friendly platform

Value Proposition Statement

"Our WordsEye platform helps teachers who want to customize their classes based on each student's preference and offer the best studying experiences by providing highly-customizable, user-friendly, and interactive educational tools"

WordsEye should focus on website promotion and design education-oriented tools

PROMOTION

- Pull strategy: marketing toward the students
  - School events
  - Student associations

- Free public lectures with WordsEye technology

- Increasing website monthly visitor count via digital marketing

- Institutional education-provider (B2B marketing)

- Pilot the program in local schools
  - Record changes in test scores

WordsEye should focus on building an educational grade tool

PRODUCT

- Grade-level-based educational tools
  - K-8 varying teaching models
- Website improvement

PRICE

- Freemium model for basic product features
- Subscription-based model for high-end features

PLACE

- Online platform
- School computers

WordsEye should build up its brand equity initially and expand its product line eventually

Phase 1 (0-6 months)

Phase 1 – Build up Brand Awareness among End-Users

- Promote WordsEye via Google Ads, Instagram, Facebook, YouTube, etc. to increase monthly visitors
- Improve website UI/UX, and make it more educational-related
  - Reduce technical jargon
  - Improve 3D images model quality
- Advertise among student parents' community (End users) to increase brand awareness

Phase 2 (06-12 months)

Phase 2 – Expand Product Line and Promote it among Buyers

- Expand product breadth
  - Students in different grades
  - Different disciplines models
- Promote WordsEye to educational institutions (Buyers) by:
  - Providing a free demo to faculties
  - Partnering with Pearson

Thank you!
